

## RKB BLITZ® Range Rigid conduit

### TECHNICAL CHARACTERISTICS - **RKB** ISOLATING RIGID SELF-EXTINGUISHING CONDUIT WITH IMQ MARKING

- **STANDARDS:** CEI EN 50086-1 and CEI EN 50086-2-1 (CEI 23-54)
- **CLASSIFICATION:** 4321
- **TRADE NAME:** RKB
- **MARKING:** RKB IMQ every 50 cm
- **COLOUR:** Grey RAL 7035
- **MATERIAL:** Self-extinguishing polyvinyl chloride (PVC) - based
- **LENGTH SUPPLIED:** 2 m bar      3 m bar      ± 0.5 %

- APPLICATION:** In view and built-in electrical systems where a good mechanical resistance to shock and compression is requested.
- INSTALLATION TYPE:** On surface and ceiling, suitable for false ceiling and floating floors.

## MORBIDX® Range accessories - IP 65

**MORBIDX® Quick reverse coupling system.**

Studied to facilitate conduit insertion and disconnection without mechanical seal. The perfect adherence of o-ring gasket material guarantees a strong conduit sealing also in vertical position.

**Neoprene gasket** next to mouth piece guarantees **IP 65 waterproof protection** also in case of thermal line compensations or possible mistakes in conduit cutting.

The wrong cutting of conduits and a non-perfect adherence with stop beats create an empty space inside the coupling that does not permit easy conduit or cable pulling.

Please push the conduit into MORBIDX till the central stop beat.

<b>DX 43 040</b>	40	5/ 90
<b>DX 43 050</b>	50	3/ 54

**INSTALLATION TYPE:** Thanks to a neoprene seal and a ring seal near the inlet, the coupling guarantees an easy insertion and pulling out of the conduit (without mechanical seal).

DX 43 432	32	28	5/ 40
DX 43 440	40	40	5/ 20

\* on request

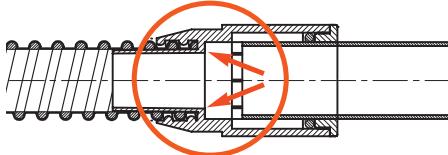

**INSTALLATION TYPE:** Pipe-fitting of a rigid protective conduit and a DIFLEX or TERMIC Ranges spiralled sheath; it allows keeping the same internal diameter at the junction point: the internal section for cable running remains constant, while increasing the space for conductors in the system.

**MATERIAL:** Self-extinguishing thermoplastic - grey RAL 7035.

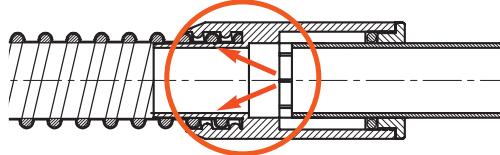

## RMG

In correspondance with the central bit of release, the internal diameter of the sheath is smaller than the conduit's, creating a section shrinkage useful for conduits passage between rigid and pliable conduits.

## NEW RMG

In the new version of RGM pipe-fittings the conduit and sheath internal section for cable running **remains constant**, while increasing the space for conductors in the system.

## Range overview

TRIX® AND QUADRIX® SYSTEM

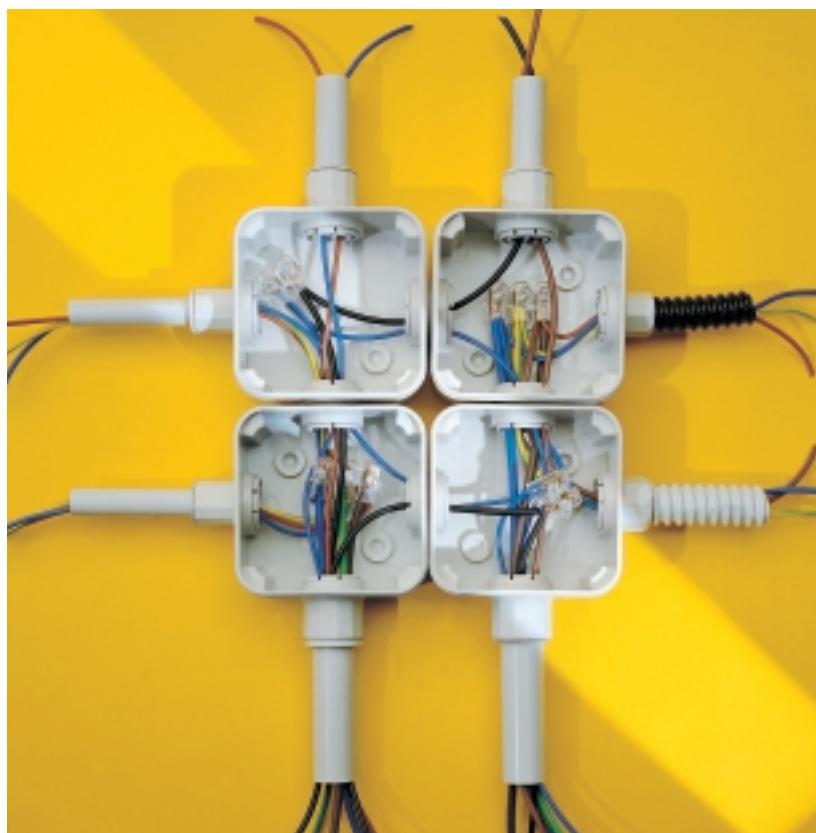

### QUADRIX®

A system of surface-mounting junction boxes with holes made for MORBIDX® Range quick installation accessories.

The modern design makes **particulary solid and resistant boxes** to every type of mechanical stress.

The possibility of interchanging the elements means that the system can be adapted to suit any installation requirement.

The **quick installation** of the accessories is guaranteed by the **clip fixing**.

### TRIX®

The first box with three inlets. Its particular shape and size makes it an ideal element for connecting lights in garages, cellars, warehouses and sheds. It is also recommended as a section breaker.

### QUADRIX®

The lid of the boxes, fitted by pressing it into place, can only be removed with a tool. In this way the system can be easily inspected while compliance with the most important safety standards is guaranteed.

By replacing closing caps with the relevant pipe-fittings it is possible to widen the original systems for following renovations, adding easily and quickly battery boxes.
