Behind Hoyer Motors

HOYER

EXCEEDING EXPECTATIONS

Hoyer Motors is an international supplier of high-end electric motors. Headquartered in Denmark and China, we are represented through sales offices and distributors worldwide. We pride ourselves of being an elite manufacturing enterprise with the highest attention to service and flexibility – a company where dedication, competitiveness and reliability are second to none.

We have selected focus on the segments Marine, HVAC, Industrial Pumps, Oil & Gas, Wind and HPU. Through strong partnerships with market leading industrial OEM's within these segments, we are able to offer a unique setup and industrial insight. We add value by understanding the business and markets of our customers.

At Hoyer Motors, meeting agreements is as natural as breathing air. We believe in trustworthy partnerships with our customers and always meet our obligations on deliveries, documentation and product quality. This is what we mean by Exceeding Expectations.

General information about Hoyer Marine Brake Motors

The marine brake motor is designed specifically for demanding marine and offshore applications. It offers value-adding flexibility due to a design where key elements such as delivery performance and customised solutions are incorporated.

Perfectly matched components are the foundation of the modular brake motor design. By using Hoyer IE2 Marine motors as the backbone of the design, both quality, documentation and short lead times are ensured. Together with the high protection marine brake from Stromag and a Kübler encoder developed for harsh conditions the Hoyer Marine Brake Motors are ready to meet the highest expectations.

Technical information

The marine brake motors are type HMC2 and always in cast iron size 132-355.

All motors are manufactured according to IEC 60034, IEC60072, EN50347 and tested according to IEC60034-2-1.

Rotor is dynamically balanced with half key, to fulfill vibration level IEC60034-14 grade A.

The motors are asynchronous low voltage three-phase squirrel-cage motors. All motors are equipped with 3xPTC in windings, heating elements for stand still protection against condensation and tropical windings. They are prepared for frequency converter duty and have IP 56 protection class for open deck usage. The range comprise two flexible designs that can be modified according to customer specifications:

- Totally enclosed non-ventilated – IEC 410
- Totally enclosed forced ventilated (Wistro cooling) – IEC 416

For motors with encoder the standard type used is Kubler 8.5020.D55F.1024.0050, Push-Pull with inverter signal, 10-30 V DC, 5 meter PVC cable, Pulse rate 1024.

Application info

Marine brake motors are mostly used for deck equipment and often placed on open deck. Typical customer applications are:

- Capstans
- Anchor winches
- Mooring winches
- Cranes
- LARS
