

### Benefits

- High rated breaking capacity of up to 15 000 A acc. to EN 60898/up to 25 kA acc. to EN 60947-2
- Excellent current limiting and selectivity characteristics
- Tripping characteristic A, B, C and D
- Terminals offer touch protection with fingers or the back of the hand acc. to the German accident prevention regulations VBG 4/BGV A2
- Combined terminals enable a simultaneous connection of busbars and feeder cables
- Uniform supplementary components which can be mounted individually, fast and on-site thanks to their snap-on technique
- The handle locking device effectively prevents any unauthorized operation of the handle

### Features of 5SX

- Especially suited for installation in flat distribution boards for building installations

### Features of 5SY

- Safe and rapid connection of the feeder cables thanks to the possibility of relocating the busbars to the back
- Identical terminals at both sides for an optional infeed from the top or the bottom
- No tool required for mounting or dismounting
- Supports fast and comfortable removal from the assembly
- Variable labeling system
- Separate switch position indication

### Features of 5SP4

- Disconnection characteristics acc. to DIN VDE 0660 Part 107
- Main switch characteristics acc. to EN 60204
- Variable labeling system
- Can be screwed onto bases
- Separate switch position indication

### Area of application

The miniature circuit-breakers of the *N System* primarily serve the purpose of protecting cables and conductors against overload and short circuits. Thus, they also serve to protect electrical equipment against excessive overheating acc. to DIN VDE 0100 Part 430.

Under certain conditions, miniature circuit-breakers also offer protection against shock currents caused by excessive touch voltage due to insulation failures acc. to DIN VDE 0100 Part 410.

Thanks to their fixed rated current settings, the miniature circuit-breakers may also be used for limited motor protection applications.

Various tripping characteristics are available, depending on the respective application. They are explained in detail in the catalog ET B1.T ("Technical Information on the ET B1 Catalog"). The EN 60898, DIN VDE 0641 Part 11 and IEC 60898 standards form the basis for the design and approval of the miniature circuit-breakers.

When used for industrial applications and for system and plant engineering applications, the miniature circuit-breakers of the *N System* are supplemented by individually mountable supplementary components such as auxiliary switches, fault signal contacts, shunt trips, undervoltage releases, RCCB modules and individually mountable accessories such as busbar systems and mounting parts.

### Design

Miniature circuit-breakers of the *N System* are equipped with a delayed overload/time-dependent thermal release (thermal bimetal) for low overcurrents and with an instantaneous electromagnetic release for high overload and short-circuit currents.

The special contact materials used guarantee a long service life and offer a high degree of protection against contact welding.

### Mode of operation

Thanks to the extremely fast contact separation in cases of failures and the rapid quenching of the arc consequently generated in the arcing chamber, the miniature circuit-breakers of the *N System* assure safe, current-limiting off-switching.

The permissible limit- $I^2t$ -values of the energy limitation class 3 specified in DIN VDE 0641 Part 11 are generally undercut by 50 %. This guarantees an excellent selectivity towards upstream overcurrent protection devices.

# BETA Miniature Circuit-Breakers

## Standard Product Range

### Introduction

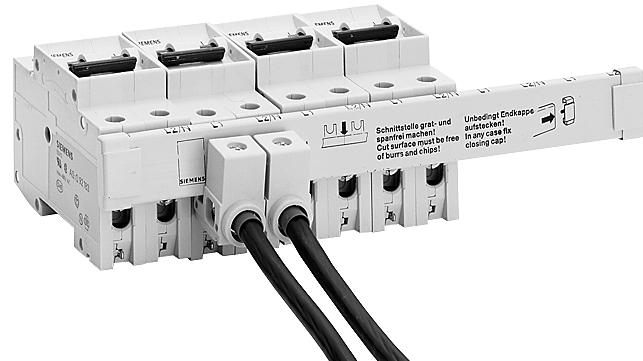

2

#### Benefits

##### Application examples for 5SX miniature circuit-breakers.

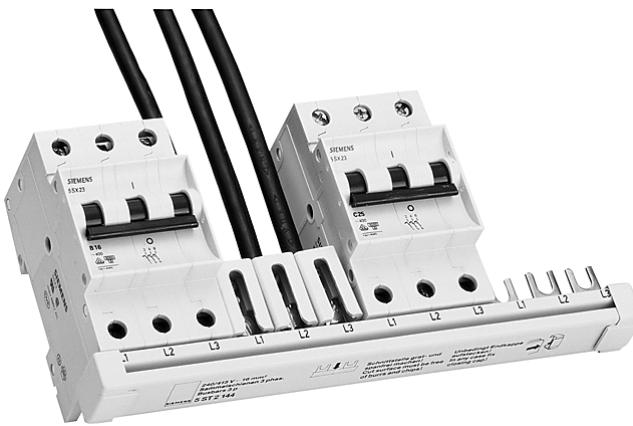

Simultaneous connection of the bottom feeder cables with cross-sections of up to 25 mm<sup>2</sup> and the 5ST2 144 3-pole busbar to the combined terminal of the miniature circuit-breaker.

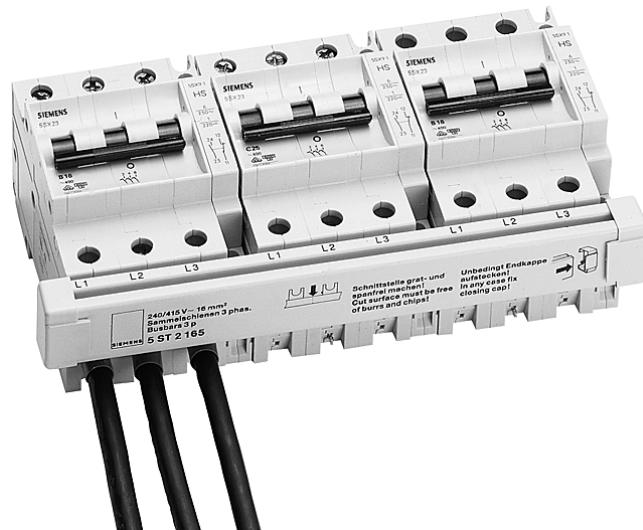

Simultaneous connection of the bottom feeder cables with cross-sections of up to 35 mm<sup>2</sup> and the 5ST2 143 2-pole busbar via the 5ST2 166 connection terminal.

The same connection principle applies to the application of top feeder cables.

Connection of the top feeder cables with cross-sections of up to 35 mm<sup>2</sup> to the 5ST2 144 busbar via the 5ST2 157 supplementary terminal.

Simultaneous connection of the feeder cables with cross-sections of up to 25 mm<sup>2</sup> and the 5ST2 165 busbar to the miniature circuit-breakers' combined terminal via locally retrofitted auxiliary switches. For a description of busbars and connection terminals, please see page 2/37.

### Area of application

- $U_n$ : 230/400 V, 50-60 Hz, applicable in networks up to AC 250/440 V, DC 60 V per pole
- Standards EN 60898, DIN VDE 0641 Part 11, IEC 60898
- Supplementary components can be retrofitted individually.

### Characteristic B

Line protection mainly used in residential building installations; no proof required regarding personal safety.

### Characteristic C

General line protection, especially advantageous with higher inrush currents (lamps, motors, etc.).

# BETA Miniature Circuit-Breakers

## Standard Product Range

### Supplementary components 55 mm mounting depth

2

#### Benefits

##### Supplementary components

- Can be retrofitted individually
- Connectable to *instabus EIB* and AS-Interface bus via binary inputs.

##### Auxiliary switches (AS) and fault signal contacts (FC)

- Mounting with factory-installed clips
- Max. contact loading acc. to DIN VDE 0660 Part 200, EN 60947-5-1:  
6 A, AC 230 V, AC-15  
1 A, DC 220 V, DC-13
- Short-circuit protection via 5SX miniature circuit-breakers; with  $I_n = 6$  A or gL fuses 6 A, depending on design ...-6, -7.

##### Function

Remote indication of the miniature circuit-breaker's switching state:

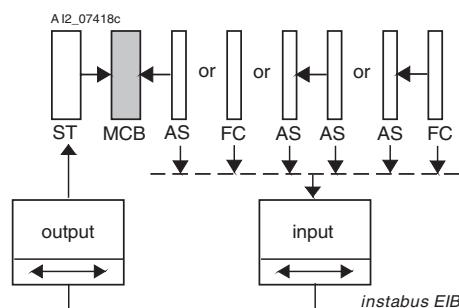

- AS: ON/OFF
- FC: tripped.

##### Shunt trips (ST)

- Assembly with enclosed screws
- Applicable for voltages of AC 110 to 415 V
- Short-circuit protection via 5SX...-7 miniature circuit-breaker with  $I_n \geq 16$  A

##### Function

- Remote tripping of the miniature circuit-breaker.

for 55 mm mounting depth**

2

### Benefits

#### 5ST2 1 busbar system

- Acc. to DIN 57606 and DIN 57659
- Load for one-side/central infeed:  
50 A/90 A for 10 mm<sup>2</sup>  
65 A/120 A for 16 mm<sup>2</sup>

- Fork-type connections
- Single and multi-phase
- Cu: 10 mm<sup>2</sup> and 16 mm<sup>2</sup>, fully insulated
- 18 mm lug spacing
- No additional connection terminal required for bottom connection.

# BETA Miniature Circuit-Breakers

## Standard Product Range

**Accessories  
for 55 mm mounting depth**

2

### Benefits

#### 5ST2 4 busbar system

- Acc. to IEC 60664, 500 V (40 °C), fully insulated
- Load for centered infeed: 1-phase up to 70 A, 2-phase to 4-phase up to 120 A.
- Fork-type connection: any length possible thanks to the combination of 3 fixed busbar lengths

- Favorable current and temperature conduction thanks to the overlapping of individual components
- Time-consuming work such as cutting, cutting to length, deburring, cleaning of cut surfaces as well as mounting of end caps is made unnecessary
- Safe touch protection for non-assigned connections.

#### Benefits

##### Features of 5SY miniature circuit-breakers

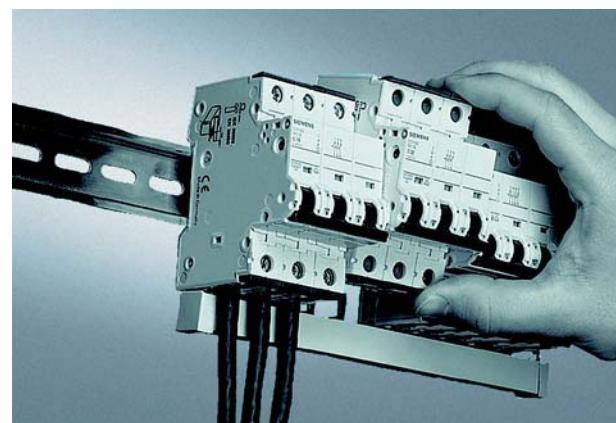

##### Easier, faster, enlarged wiring space

- Identical top and bottom terminals
- Connection of feeder cables vis-à-vis of the busbar
- Enlarged and easily accessible wiring space for the feeder cables
- Comfortable insertion of the feeder cables into the terminal
- Defined, visible and controllable connection of the feeder cables
- Universal infeed with top and bottom busbar mounting options.

##### Touch protection with clear advantages

- Integrated movable terminal covers located at the feeder cable input section
- The terminals are completely closed when screws are fully tightened
- Effective touch protection, also when the device is fully grabbed
- The requirements specified in the German VBG 4/BGV A2 accident prevention regulations are exceeded by far.

##### Flexible and no use of tools required

- Manually operable quick-assembly and disassembly systems not requiring the use of tools
- Fast assembly and disassembly of the 5SY miniature circuit-breakers to and from the standard mounting rail acc. to EN 60175
- All devices can be easily and comfortably replaced at any time.

##### Removal from the assembly

Thanks to the combination of the various features stated above, the 5SY miniature circuit-breakers can be easily and rapidly removed from the assembly when circuits need to be changed - with these devices, a removal of the busbar is no longer necessary.

# BETA Miniature Circuit-Breakers

## Industry Product Range

**6 kA**  
**70 mm mounting depth**

### Area of application

- $U_n$ : AC 230 V, 50-60 Hz
- Standards: EN 60898, DIN VDE 0641 Part 11, IEC 60898

### Characteristic B

Line protection, mainly used for outlet circuits; no proof required regarding personal safety.

### Characteristic C

General line protection, especially advantageous with higher inrush currents (lamps, motors, etc.).

### Benefits

#### Auxiliary switch (AS)

- Can be retrofitted individually
- Mounting with factory-installed clips
- max. contact loading acc. to DIN VDE 0660 Part 200, EN 60947-5-1:  
6 A, AC 230 V, AC-15  
1 A, DC 220 V, DC-13
- Short-circuit protection ensured by circuit-breakers with  $I_n = 6$  A or fuse gL 6 A
- Conductor cross-section 0.5 to 2.5 mm<sup>2</sup>

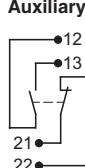

### Functions

- Remote indication of the miniature circuit-breaker's switching state: AS: ON/OFF
- Connectable to *instabus EIB* and AS-Interface bus via binary inputs.

### Selection and ordering data

	MW	DC	Order No.	Pack. unit*	Weight per unit approx. kg
<b>Auxiliary switch (AS)</b>	1 NO + 1 NC	0.5	A <b>5ST3 018-0KV</b>	1	0.037

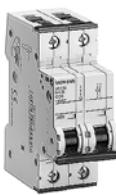

### Area of application

- $U_n$ : 230/400 V, 50-60 Hz, applicable in networks up to AC 250/440 V, DC 60 V per pole
- Standards EN 60898, DIN VDE 0641 Part 11, IEC 60898
- Supplementary components can be retrofitted.

### Characteristic B

Line protection, mainly used for outlet circuits; no proof required regarding personal safety.

### Selection and ordering data

1) Also suitable for 21 kW active power at DC 400 V (e.g. continuous-flow water heater with short-time operation) and 7 kW active power at AC 230 V (e.g. hot water storage tank in non-continuous operation). For continuous load applications, the use of miniature circuit-breakers of characteristic B or C and  $I_n = 40$  A is recommended.

All 5SY6 designs have been approved acc. to UL 1077 and CSA 22.2 No. 235-M 89 and can therefore be used as "supplementary protectors" up to AC 277 V (1-pole and 1-pole + N design) and AC 480 V (2-pole, 3-pole, 3-pole + N and 4-pole design).

For supplementary components, please see page 2/57.  
For accessories, please see pages 2/60 and 2/61.

# BETA Miniature Circuit-Breakers

## Industry Product Range

6 000  
3

**6 kA**  
**70 mm mounting depth**

**2**

### Area of application

- $U_n$ : 230/400 V, 50-60 Hz, applicable in networks up to AC 250/440 V, DC 60 V per pole
- Standards EN 60898, DIN VDE 0641 Part 11, IEC 60898
- Supplementary components can be retrofitted.

### Characteristic C

General line protection, especially advantageous with higher inrush currents (lamps, motors, etc.).

### Characteristic D

Tripping range adapted to operating equipment involving significant pulse generation (transformers, solenoid valves).

1) Also suitable for 21 kW active power at DC 400 V (e.g. continuous-flow water heater with short-time operation) and 7 kW active power at AC 230 V (e.g. hot water storage tank in non-continuous operation). For continuous load applications, the use of miniature circuit-breakers of characteristic B or C and  $I_n = 40$  A is recommended.

All 5SY6 designs have been approved acc. to UL 1077 and CSA 22.2 No. 235-M 89 and can therefore be used as "supplementary protectors" up to AC 277 V (1-pole and 1-pole + N design) and AC 480 V (2-pole, 3-pole, 3-pole + N and 4-pole design).

For supplementary components, please see page 2/57.

For accessories, please see pages 2/60 and 2/61.

\* This quantity or a multiple thereof can be ordered.

1) Also suitable for 21 kW active power at DC 400 V (e.g. continuous-flow water heater with short-time operation) and 7 kW active power at AC 230 V (e.g. hot water storage tank in non-continuous operation). For continuous load applications, the use of miniature circuit-breakers of characteristic B or C and  $I_n = 40$  A is recommended.

All 5SY6 designs have been approved acc. to UL 1077 and CSA 22.2 No. 235-M 89 and can therefore be used as "supplementary protectors" up to AC 277 V (1-pole and 1-pole + N design) and AC 480 V (2-pole, 3-pole, 3-pole + N and 4-pole design).

For supplementary components, please see page 2/57.  
For accessories, please see pages 2/60 and 2/61.

# BETA Miniature Circuit-Breakers

## Industry Product Range

10 000  
3

**10 kA**  
**70 mm mounting depth**

**2**

### Area of application

- $U_n$ : 230/400 V, 50-60 Hz, applicable in networks up to AC 250/440 V, DC 60 V per pole
- Standards EN 60898, DIN VDE 0641 Part 11, IEC 60898
- Supplementary components can be retrofitted.

- Protection of measuring circuits with converters
- Protection of circuits with large cable lengths and a requirement for off-switching after 0.4 s acc. to DIN VDE 0100 Part 410.

### Characteristic A

- For limited semiconductor protection

### Characteristic B

Line protection, mainly used for outlet circuits; no proof required regarding personal safety.

# BETA Miniature Circuit-Breakers

## Industry Product Range

**10 kA**  
**70 mm mounting depth**

2

### Area of application

#### Characteristic C

General line protection, especially advantageous with higher in-rush currents (lamps, motors, etc.).

#### Characteristic D

Tripping range adapted to operating equipment involving significant pulse generation (transformers, solenoid valves).

1) Only applicable for 5SY4 132-7:

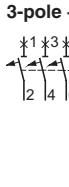

Also suitable for 21 kW active power at DC 400 V (e.g. continuous-flow water heater with short-time operation) and 7 kW active power at AC 230 V (e.g. hot water storage tank in non-continuous operation). For continuous load applications, the use of miniature circuit-breakers of characteristic B or C and  $I_h = 40$  A is recommended.

All 5SY4 designs have been approved acc. to UL 1077 and CSA 22.2 No. 235-M 89 and can therefore be used as "supplementary protectors" up to AC 277 V (1-pole and 1-pole + N design) and AC 480 V (2-pole, 3-pole, 3-pole + N and 4-pole design).

For supplementary components, please see pages 2/55, 2/57 and 2/59.

For accessories, please see pages 2/60 and 2/61.

You can order this amount or a multiple of this amount.

1) Only applicable for 5SY4 332-7 and 5SY7 132-6:

Also suitable for 21 kW active power at DC 400 V (e.g. continuous-flow water heater with short-time operation) and 7 kW active power at AC 230 V (e.g. hot water storage tank in non-continuous operation). For continuous load applications, the use of miniature circuit-breakers of characteristic B or C and  $I_n = 40$  A is recommended.

Please note for pages 2/47 and 2/48:

All 5SY4 and 5SY7 designs have been approved acc. to UL 1077 and CSA 22.2 No. 235-M 89 and can therefore be used as "supplementary protectors" up to AC 277 V (1-pole and 1-pole + N design) and AC 480 V (2-pole, 3-pole, 3-pole + N and 4-pole design).

The following cross-references and footnotes apply for pages 2/47 and 2/48:

For supplementary components, please see pages 2/55, 2/57 and 2/59.

For accessories, please see pages 2/60 and 2/61.

# BETA Miniature Circuit-Breakers

## Industry Product Range

15 000  
3

**15 kA**  
**70 mm mounting depth**

**2**

### Area of application

- $U_n$ : 230/400 V, 50-60 Hz, applicable in networks up to AC 250/440 V, DC 60 V per pole
- Standards EN 60898, DIN VDE 0641 Part 11, IEC 60898
- Supplementary components can be retrofitted.

### Characteristic B

Line protection, mainly used for outlet circuits; no proof required regarding personal safety.

**Area of application****Characteristic C**

General line protection, especially advantageous with higher in-rush currents (lamps, motors, etc.,).

**Characteristic D**

Tripping range adapted to operating equipment involving significant pulse generation (transformers, solenoid valves).

**The following footnotes apply to pages 2/48 and 2/49:**

- 1) Only applicable for 5SY7 132-6 and 5SY7 132-7:  
Also suitable for 21 kW active power at DC 400 V (e.g. continuous-flow water heater with short-time operation) and 7 kW active power at AC 230 V (e.g. hot water storage tank in non-continuous operation). For continuous load applications, the use of miniature circuit-breakers of characteristic B or C and  $I_n = 40$  A is recommended.

All 5SY7 designs have been approved acc. to UL 1077 and CSA 22.2 No. 235-M 89 and can therefore be used as "supplementary protectors" up to AC 277 V (1-pole and 1-pole + N design) and AC 480 V (2-pole, 3-pole, 3-pole + N and 4-pole design).

For supplementary components, please see pages 2/55, 2/57 and 2/59.

For accessories, please see pages 2/60 and 2/61.

1) Only applicable for 5SY7 332-7:

Also suitable for 21 kW active power at DC 400 V (e.g. continuous-flow water heater with short-time operation) and 7 kW active power at AC 230 V (e.g. hot water storage tank in non-continuous operation). For continuous load applications, the use of miniature circuit-breakers of characteristic B or C and  $I_n = 40$  A is recommended.

All 5SY7 designs have been approved acc. to UL 1077 and CSA 22.2 No. 235-M 89 and can therefore be used as "supplementary protectors" up to AC 277 V (1-pole and 1-pole + N design) and AC 480 V (2-pole, 3-pole, 3-pole + N and 4-pole design).

For supplementary components, please see pages 2/55, 2/57 and 2/59.

For accessories, please see pages 2/60 and 2/61.

25 kA  
70 mm mounting depth

### Area of application

- $U_n$ : 230/400 V, 50-60 Hz, applicable in networks up to AC 250/440 V, DC 60 V per pole
- Standards EN 60 947-2, IEC 60 947-2
- Supplementary components can be retrofitted.

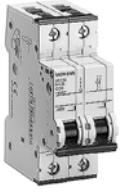

### Characteristic C

General line protection, especially advantageous with higher inrush currents (lamps, motors, etc.).

### Characteristic D

Tripping range adapted to operating equipment involving significant pulse generation (transformers, solenoid valves).

1) Only applicable for 5SY8 132-7:

Also suitable for 21 kW active power at DC 400 V (e.g. continuous-flow water heater with short-time operation) and 7 kW active power at AC 230 V (e.g. hot water storage tank in non-continuous operation). For continuous load applications, the use of miniature circuit-breakers of characteristic C and  $I_n = 40$  A is recommended.

For supplementary components, please see pages 2/55, 2/57 and 2/59.

For accessories, please see pages 2/60 and 2/61.

1) Only applicable for 5SY8 332-7.  
Also suitable for 21 kW active power at DC 400 V (e.g. continuous-flow water heater with short-time operation) and 7 kW active power at AC 230 V (e.g. hot water storage tank in non-continuous operation). For continuous load applications, the use of miniature circuit-breakers of characteristic C and  $I_n = 40$  A is recommended.

### Area of application

- $U_n$ : 230/400 V, 50-60 Hz, 220 V DC per pole, applicable in networks up to: AC 250/440 V
  - 220 V DC: 1-pole
  - 440 V DC: 2-pole
- Standards EN 60898, DIN VDE 0641 Part 11, IEC 60898
- Supplementary components can be retrofitted.

### Characteristic B

Line protection, mainly used for outlet circuits; no proof required regarding personal safety.

### Characteristic C

General line protection, especially advantageous with higher inrush currents (lamps, motors, etc.).

1) Also suitable for 21 kW active power at DC 400 V (e.g. continuous-flow water heater with short-time operation) and 7 kW active power at AC 230 V (e.g. hot water storage tank in non-continuous operation). For continuous load applications, the use of 5SY ...-6/7 miniature circuit-breakers with  $I_n = 40$  A is recommended.

The terminal section indicates the DC polarity value which must essentially be observed during connection.

For supplementary components, please see pages 2/57 and 2/59.

For accessories, please see pages 2/60 and 2/61.

# BETA Miniature Circuit-Breakers

## High-Current Product Range

10 000  
3

**10 kA**  
**70 mm mounting depth**

**2**

### Area of application

- $U_n$ : 230/400 V, 50-60 Hz, applicable in networks up to AC 250/440 V, DC 60 V per pole
- Standards EN 60898, IEC 60898, DIN VDE 0641 Part 11, EN 60204
- Supplementary components can be retrofitted individually
- Main control switch characteristics acc. to EN 60204
- Can be snapped onto standard mounting rail acc. to EN 60175
- Can be screwed onto bases
- As main control and miniature circuit-breaker in non-residential and industrial buildings.

### Characteristic B

Line protection, mainly used for outlet circuits; no proof required regarding personal safety.

### Characteristic C

General line protection, especially advantageous with higher inrush currents (lamps, motors, etc.).

### Characteristic D

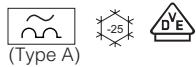

Tripping range adapted to operating equipment involving significant pulse generation (transformers, solenoid valves).

## Supplementary components

RCCB modules  
70 mm mounting depth

2

### Area of application

- 2-, 3- and 4-pole,  $U_n$ : 230/400 V, 50-60 Hz, applicable in networks: AC 250/440 V
- Standards IEC/EN 61009-1 (VDE 0664, Part 20), IEC/EN 61009-2-1 (VDE 0664, Part 21)

- Design **S** for selective disconnection
- Can be individually retrofitted<sup>1)</sup> in combination with miniature circuit-breakers of characteristic A, B, C and D.

# BETA Miniature Circuit-Breakers

## Supplementary components

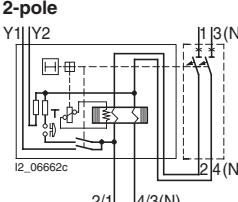

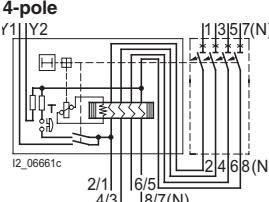

### RCCB modules 70 mm mounting depth

2

#### Area of application

- 2-pole  $U_n$ : 125/230 V, 50-60 Hz; 3- and 4-pole  $U_n$ : 230/400 V, 50-60 Hz; applicable in networks: 2-pole: AC 125/240 V, 3- and 4-pole: AC 240/415 V
- Standards IEC/EN 61009-1 (VDE 0664, Part 20), IEC/EN 61009-2-1 (VDE 0664, Part 21)
- Design **S** for selective disconnection
- Can be individually retrofitted<sup>1)</sup> in combination with miniature circuit-breakers of characteristic B and C.

# BETA Miniature Circuit-Breakers

## Supplementary components

Auxiliary switches, fault signal contacts  
70 mm mounting depth

2

### Benefits

- Can be individually retrofitted<sup>1)</sup>
- Mounting with factory-installed clips
- Short-circuit protection via miniature circuit-breakers of characteristic B or C and  $I_n = 6 \text{ A}$  or gL 6 A fuses.
- Broad range of applications thanks to the additional version for controlling programmable controllers (PLC) acc. to EN 61131-2
- Connectable to *instabus EIB* and AS-Interface bus via binary inputs.

### Functions

- Indication of the miniature circuit-breaker's switching state:
  - AS: ON/OFF
  - FC: tripped.

### Auxiliary switches (AS) and fault signal contacts (FC)

**5ST3 0.0**

**5ST3 0.1**

**5ST3 0.2**

- Max. contact load:

NO contacts:  
2 A, AC 400 V, AC-14  
6 A, AC 230 V, AC-14  
1 A, DC 220 V, DC-13  
1 A, DC 110 V, DC-13  
3 A, DC 60 V, DC-13  
6 A, DC 24 V, DC-13

NC contacts:  
2 A, AC 400 V, AC-13  
6 A, AC 230 V, AC-13  
1 A, DC 220 V, DC-13  
1 A, DC 110 V, DC-13  
3 A, DC 60 V, DC-13  
6 A, DC 24 V, DC-13

### Auxiliary switches (AS)

**5ST3 013**

**5ST3 014**

**5ST3 015**

- Range of application 1 mA/DC 5 V up to 50 mA/DC 30 V.

# BETA Miniature Circuit-Breakers

## Supplementary components

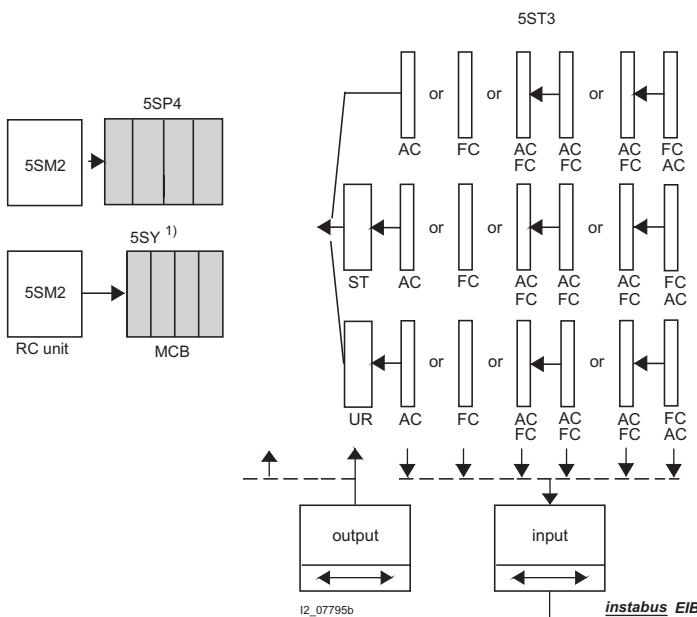

**Auxiliary switches, fault signal contacts  
70 mm mounting depth**

2

### Design

#### Retrofitting concept

According to the retrofitting concept, all 5ST3 supplementary components can be combined with miniature circuit-breakers from the 5SY<sup>1)</sup> and 5SP4 series:

### Benefits

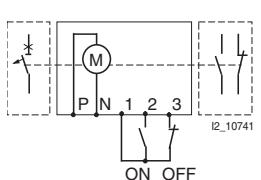

#### Remote-controlled operating mechanism

- Can be retrofitted individually<sup>2)</sup>
- Mounting with factory-installed clips
- Can be mechanically locked
- Supplementary components can be retrofitted
- Function selector switch on the front
- Connectable to instabus EIB and AS-Interface bus via binary inputs and outputs
- $U_n = 230 \text{ V}$ , 50 to 60 Hz

### Functions

- Remote switching ON/OFF of the miniature circuit-breaker and ON of the RCCB module
- In the case of fault conditions, remote on-switching is possible after acknowledgement
- Manual switching on site is possible
- Remote display of the switching status of the remote-controlled operating mechanism and the miniature circuit-breaker

### Selection and ordering data

	Rated voltage $U_n$	MW	DC	Order No.	Pack. unit*	Weight per unit approx. kg
<b>Remote-controlled operating mechanism (RC) for 5SY<sup>1)</sup>and 5SP4 miniature circuit-breakers</b>

# BETA Miniature Circuit-Breakers

## Supplementary components

Shunt trips, undervoltage releases  
70 mm mounting depth

2

### Area of application

#### Shunt trip<sup>1)</sup>

- Response limits acc. to DIN VDE 0660 Part 100, 7.2.1.4
- Suitable for voltages: Connectable to the *instabus EIB* and the AS-Interface Bus via binary outputs AC 110 to 415 V, DC 110 V, AC/DC 24 to 48 V.

### Functions

Remote tripping of the miniature circuit-breaker.

### Selection and ordering data

	MW	DC	Order No.	Pack. unit*	Weight per unit approx. kg
<b>Shunt trip (ST) for 5SY<sup>2)</sup>, 5SP4 miniature circuit-breakers</b>					
	AC 110-415 V	1	A <b>5ST3 030</b>	1	0.098
	AC/DC 24-48 V	1	A <b>5ST3 031</b>	1	0.098

### Area of application

#### Undervoltage release<sup>1)</sup>

- Response limits acc. to DIN VDE 0660 Part 100, 7.2.1.3
- Suitable for voltages:  
AC 230 V  
DC 110 V  
DC 24 V
- Connectable to *instabus EIB* and AS-Interface bus via binary inputs.

### Functions

- Applicable as remote trip in an EMERGENCY-OFF loop
- Assures disconnection of the control circuit acc. to EN 60204
- In cases of interrupted or insufficient voltage, the undervoltage release trips the miniature circuit-breaker or prevents it from switching on.

### Selection and ordering data

	MW	DC	Order No.	Pack. unit*	Weight per unit approx. kg

# BETA Miniature Circuit-Breakers

## Accessories

### Busbar system

#### Area of application

##### Busbar system

- Acc. to DIN 57606 and DIN 57659
- Load for one-side/central infeed: 65 A/120 A for 16 mm<sup>2</sup>
- Pin-type connections
- Single and multi-phase

- Cu: 16 mm<sup>2</sup> and fully insulated
- 18 mm lug spacing
- No additional connection terminal required for stranded connections up to 35 mm<sup>2</sup>
- Excellent accessibility of the feeder cables.

#### Selection and ordering data

for 55 mm and 70 mm mounting depth

### Functions

#### Inscription labels

- Self-adhesive
- Inscription options:
  - manually, with smear-resistant and water-proof markers
  - via computer-controlled labeling system.

### Benefits

- Saves time and costs
- Uniform and legible inscriptions
- Supports all types of inscription possibilities, including special characters
- Easy data entry and program operation via interactive dialog.

## *Definitions*

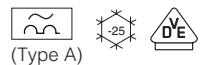

1 MW = modular width of 18 mm

N-type = device mounting depth of 55 mm

Depth 70 mm = device mounting depth of 70 mm

# BETA Residual-Current Operated Circuit-Breakers

## RCCB Standard Product Range

**N-type, 16 A to 80 A**  
**55 mm mounting range**

**2**

### Area of application

- Device standards: IEC/EN 61008-1 (VDE 0664, Part 10), IEC/EN 61008-2-1 (VDE 0664, Part 11)
- $U_n$  230/400 V; 50 to 60 Hz;  $U_n$  230/400 V; 50 to 400 Hz; applicable in networks of up to AC 240/415 V
- $U_n$  500/V; 50 to 60 Hz applicable in AC 500 V networks
- Terminals with wire protection can be used for direct busbar mounting at the bottom with devices with modular-size terminals, e.g. with 5SX2 and 5SX4 MCBs
- Retrofitting of auxiliary switches on the right hand side of the casing

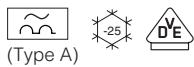

- Switch handle and test button can be locked
- Designs
  - S** for selective disconnection
  - K** for short-time delayed disconnection
- Type of surge current 8/20 acc. to DIN VDE 0432 Part 2 surge strength instantaneous > 1 kA,  
**K** > 3 kA,  
**S** > 5 kA

1) Approval acc. to IEC/EN 61008 (VDE 0664) is only possible up to 440 V.

For supplementary components and accessories, please see page 2/66.

### Benefits

Thanks to the leakage current measurement unit, the rated fault current for the RCCB can be selected systematically and unintended trippings will be avoided. The measured leakage current should not be higher than a maximum of 1/3 of the rated fault current of the RCCB. If this condition is not given due to the rated current required for the protective measures for the RCCB, corrective measures must be taken at the respective operating equipment which generates the leakage current.

The detection of causes for the unintended tripping of the RCCB is considerably simplified, especially with regard to large systems.

- Rated voltage: up to AC 500 V; 50 Hz to 60 Hz
- For measuring leakage currents of up to 300 mA in electrical systems

• Using the enclosed calibration curve, a voltmeter with an internal resistance of  $> 1 \text{ M}\Omega/\text{V}$  can determine the leakage current. Measuring range for AC voltage:  $U_{\text{eff}}$ : 1 mV - 2 V

• **Leakage currents** are currents, which, during uninterrupted operation, leak off the PE conductor or other ground connections. As a result, the difference of the currents flowing to and from the device will be higher than zero thanks to the RCCB. If the tripping current of the residual-current operated circuit-breaker is then reached, it will trip since leakage currents are similarly recorded and evaluated as fault currents.

• The leakage current measurement unit detects the static leakage currents flowing. The device records and evaluates the currents like the RCCB and thus provides a direct statement on the extent to which the RCCB has already been pre-loaded.

### Area of application

- Device standards: IEC/EN 61008-1(VDE 0664, Part 10), IEC 60755, VDE 0664 Part 100
- $U_n$  230/400 V; 50 to 60 Hz;  
applicable in networks: AC 240/415 V
- For AC fault currents, pulsating and smooth DC fault currents
- For designs with fixed mounted auxiliary switches contact 1 NO + 1 NC, AC 6 A/230 V, DC 1 A/220 V terminals for conductor cross sections of up to 2.5 mm<sup>2</sup>
- Design **S** for selective disconnection

• Type of surge current 8/20 acc. to DIN VDE 0432  
surge strength:

instantaneous > 1 kA  
**S** > 5 kA

• These devices are used in systems where, in addition to AC and pulsating DC fault currents, smooth or almost smooth DC fault currents may also occur (e.g. with B6 bridge connection in devices such as frequency converters and medical devices).
